Javascript	Ruby	Bootstrap 3	Ruby on Rails	Mongoose JS	
		Less		Active Record	

Techniques			Programs	
REST		User Experience	Sublime Text	Dreamweaver
CRUD		User Interaction	MAMP	Photoshop
Wireframing		Interface Design	Terminal	Illustrator
Personas		Project Management	MySQLWorkbench	InDesign
Branding		Database Design (ERD)		
E-Commerce		Content Management Systems		

Work & Education

Insteo - Long Beach, CA
Front End Coder, March 2013 - November 2014

Design, develop, and maintain various customizable digital signs and websites within their content management system.

- Increased the company's popularity and image in the industry by researching and implementing touchscreen and wayfinding techniques, Javascript, JQuery, and branding guidelines, to create a web application used on the Queen Mary Ship and Hotel in Long Beach, CA., that won Insteo a Gold Apex Award at the 2014 Digital Signage Expo.
- Increased the production and maintenance of digital signs by being knowledgeable and helpful about programming techniques and implementing an easy to follow instructional Javascript script giving other programmers a more streamlined method to fix and create more digital signs.
- Increased the company's library of applications by creating over 20 digital signage websites connecting to their database to be reused and customized for their customers.
- Provided great system support and client service by setting up, maintaining, organizing, and troubleshooting PCs, monitors, and websites, to be used by clients. Including driving alone to give on-site support for the client.

Coding Dojo - Seattle, WA
Blackbelt in Web Development, Completed June 2015

An intensive 12 week full-time web development program and earning the first blackbelt of my class on first try in a 4 hour exam of the MEAN stack, 1 of 15 students.

The Art Institute of Orange County - Santa Ana, CA
BS in Web Design and Interactive Media, 3.5GPA   - Completed Sep 2012
